ISSUE:

Cooperative Agreement with Utah Department of Transportation (UDOT) for betterment work on 3500 South Project.

SYNOPSIS:

Under this agreement, West Valley City will pay for trenching and conduit work necessitated by placing the utilities underground. The agreement also covers landscaping and street lighting facilities to be installed within the project boundaries.

BACKGROUND:

Previous agreements have been signed with Rocky Mountain Power, Comcast, Qwest and UTOPIA for placing utility lines underground on 3500 South. Those agreements covered the replacement of existing overhead lines in underground conduits to be installed by UDOT. This agreement authorizes payment to UDOT for the cost of installing the underground conduit.

This agreement also covers landscaping to be installed by UDOT's contractor. UDOT will install street trees and an irrigation system. Upon final acceptance of the improvements, the City agrees to own and maintain the landscaping.

This agreement also addresses decorative street lighting. UDOT will install standard luminaires at the major intersections, which will become property of the City and be maintained by the City. UDOT will provide and install decorative street lighting foundations as part of the project. The City will install decorative poles and fixtures within three years of the completion of the project. The estimated additional cost of the decorative street lighting is \$750,000. The decorative street lighting will be owned and maintained by the City.

The City is required to deposit \$215,324.05 with UDOT upon execution of this Agreement.

RECOMMENDATION:

Approval of Cooperative Agreement
